 - MSRP
 - Location of Nearest Dealer
- Features
 - Information Overlaid Over Car Image
 - Share Car Information Through Social Media
- Technologies
 - Apple iOS 7
 - Xcode
 - Metaio

System Architecture

Car Identification

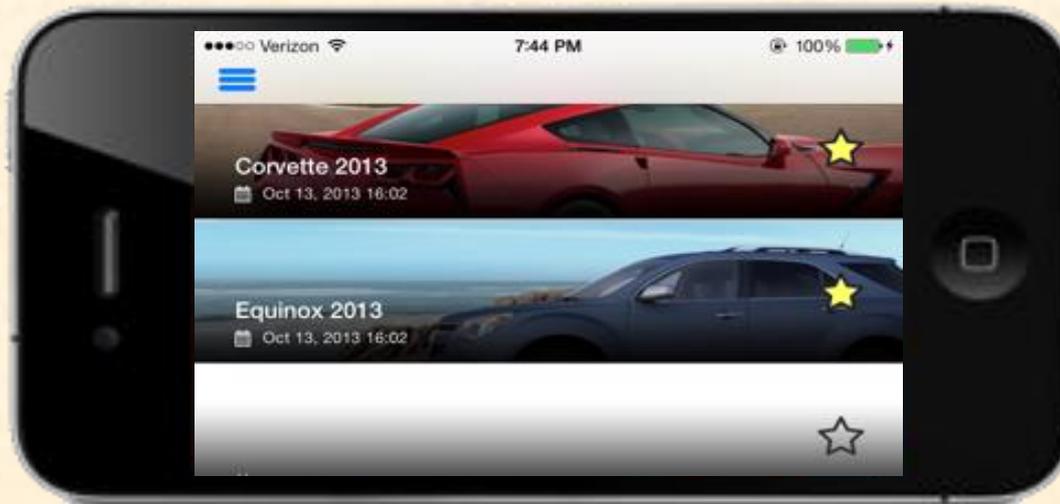

Social Sharing

The screenshot displays a Facebook mobile interface. At the top, the browser address bar shows the URL: <https://www.facebook.com/photo.php?fbid=689052097780251&set=a.687822944569833.1073741826.100000264014559&type=1&theater>. The main content area features a large image of a blue sports car, with the text "powered by metaio" overlaid in the bottom left corner. To the right of the image is a post by David Wigell, dated "about an hour ago via GM Augment". The post includes options to "Add a description", "Tag Photo", "Add Location", and "Edit". Below the post are sections for "Like - Comment - Unfollow Post - Share - Edit", "Write a comment...", "Friend Requests" (listing Megan Rivera with 6 mutual friends), and "Sponsored" (listing Sir Pizza of Lansing with a description of their pizzas and pasta). The bottom of the screen shows a search bar and a "Search" button.

Car Information Page

What's left to do?

- Integration of Information Page
- Landscape VS Portrait
- iOS 7 Look and Feel
- Twitter and Facebook API Bugs
