Department of Computer Science and Engineering
Michigan State University

Fall 2014

*From Students...
...to Professionals*

Project Overview

- Create a mobile web app for Spectrum Health Employee's to see discounts available for them.
- Able to work with tablets and phones through responsive design.
- Follow Spectrum Health's UI/UX guidelines to provide a consistent and healthy user experience

Functional Specifications

- Be able to categorize discounts (i.e. Pets, Salon & Spa, Automotive etc...)
- Be able to search discounts either by category or all discounts available
- Be able to see discounts within a certain radius of the device's location
- Be able to 'favorite' discounts and access all 'favorited' discounts from application landing page.
- Be able to share discounts on social media sites such as Facebook and Twitter.

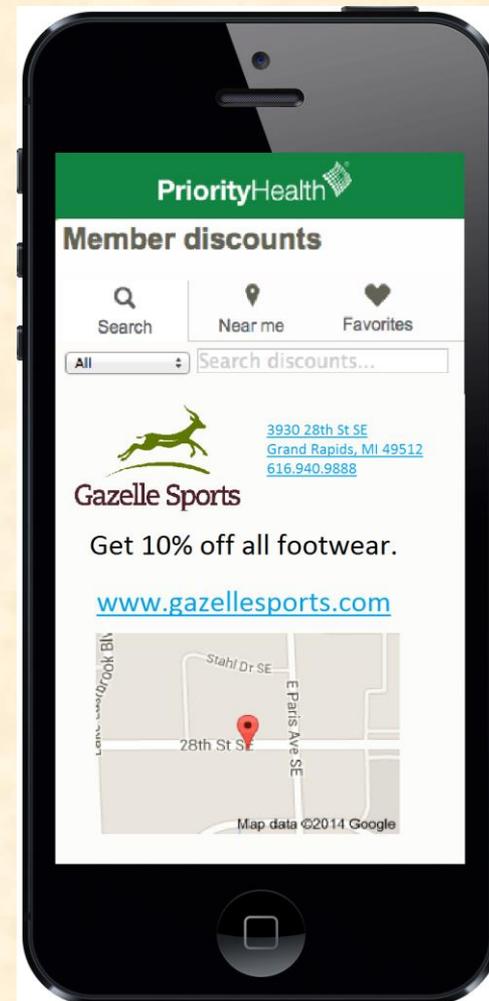

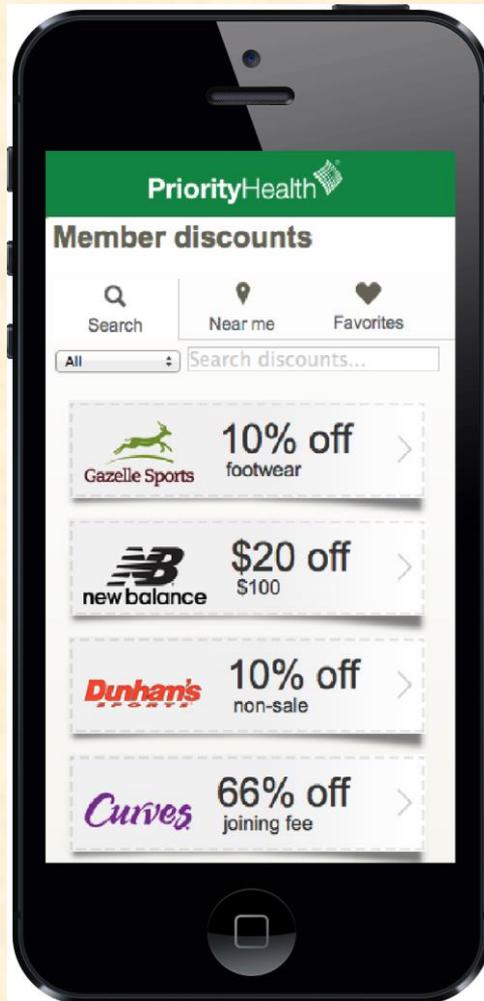

Design Specifications

- Each page has a unified control panel to navigate the application.
- The landing page contains a list of the discounts which can be sorted via category and searched via name or location.
- The discount page provides the user with more details about the discount and company.
- The color pallet and UX/UI specifications follow Spectrum Health's guidelines.

Screen Mockup: Landing and Discount Page

Technical Specifications

- Microsoft Visual Studio Professional 2013
- Netbeans IDE
- Github private repository
- Database Schema:

Table: DISCOUNTS

<u>Discount_ID</u>	Discount_Label	Company_ID	Category	Code	Link
---------------------------	----------------	------------	----------	------	------

Table: CATEGORIES

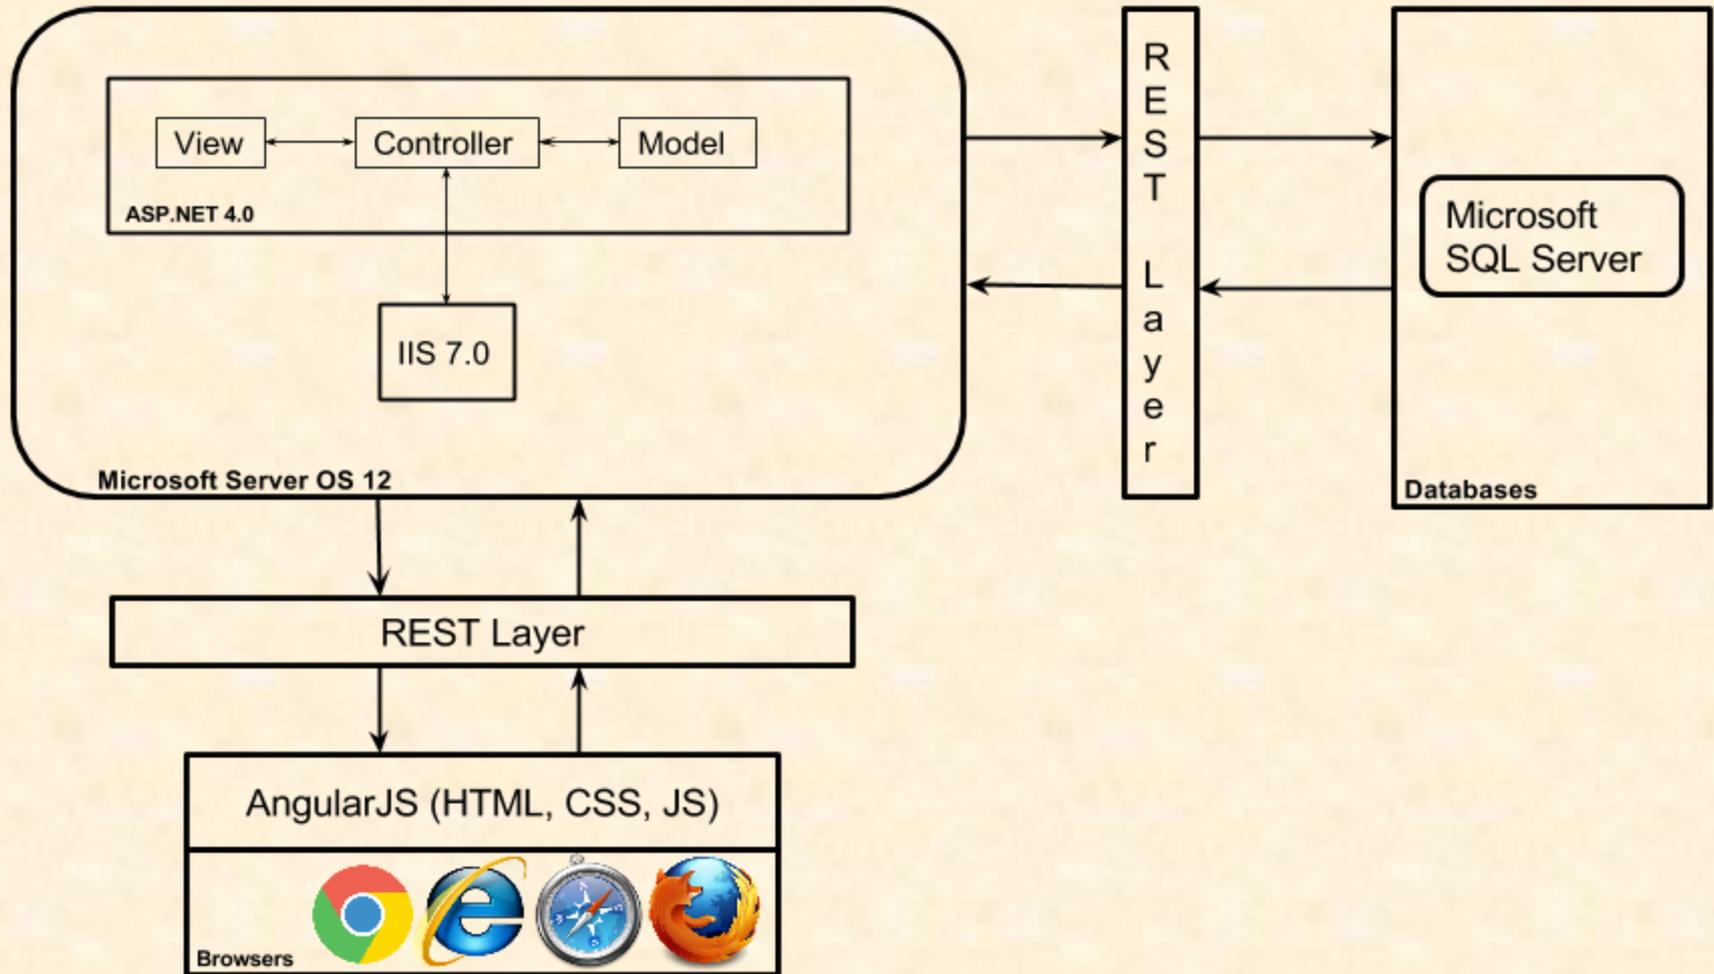

<u>Category</u>	Category_logo
------------------------	---------------

Table: COMPANIES

<u>Company_ID</u>	Company_logo	Address
--------------------------	--------------	---------

System Architecture

System Components

- Hardware Platforms
 - Dell rack mounted server
 - 2 iMacs
 - Android, iPhone, Nexus
- Software Platforms / Technologies
 - AngularJS
 - ASP.net MVC
 - Microsoft Internet Information Services (IIS) 7.0
 - Javascript
 - CSS, HTML5
 - REST Web Service Layer

Testing

- Microsoft Unit Testing Framework
- Manual testing on team members devices
- Field Testing of location based features will be required

Risks

- Multiple REST layers
 - Research on JSON REST to get a firm understanding of how it all works
- How to use Windows IIS web servers
 - The client informed us we will be using IIS servers for development, which no member on our team has used before
 - Research on IIS 7.0 to get a firm understanding
- Code might not comply with companies security
 - Send our client our code periodically for them to test against their system
