Michigan State University

Spring 2016

*From Students...
...to Professionals*

Functional Specifications

- Nurses or other hospital staff can create Patient Care Plans with the Staff Application
- Allow patients to view their personal Care Plan on the Patient Application
- Patients can track their timeline to discharge from the hospital
- Allow for video communication between patients and surgeons/nurses/hospital staff

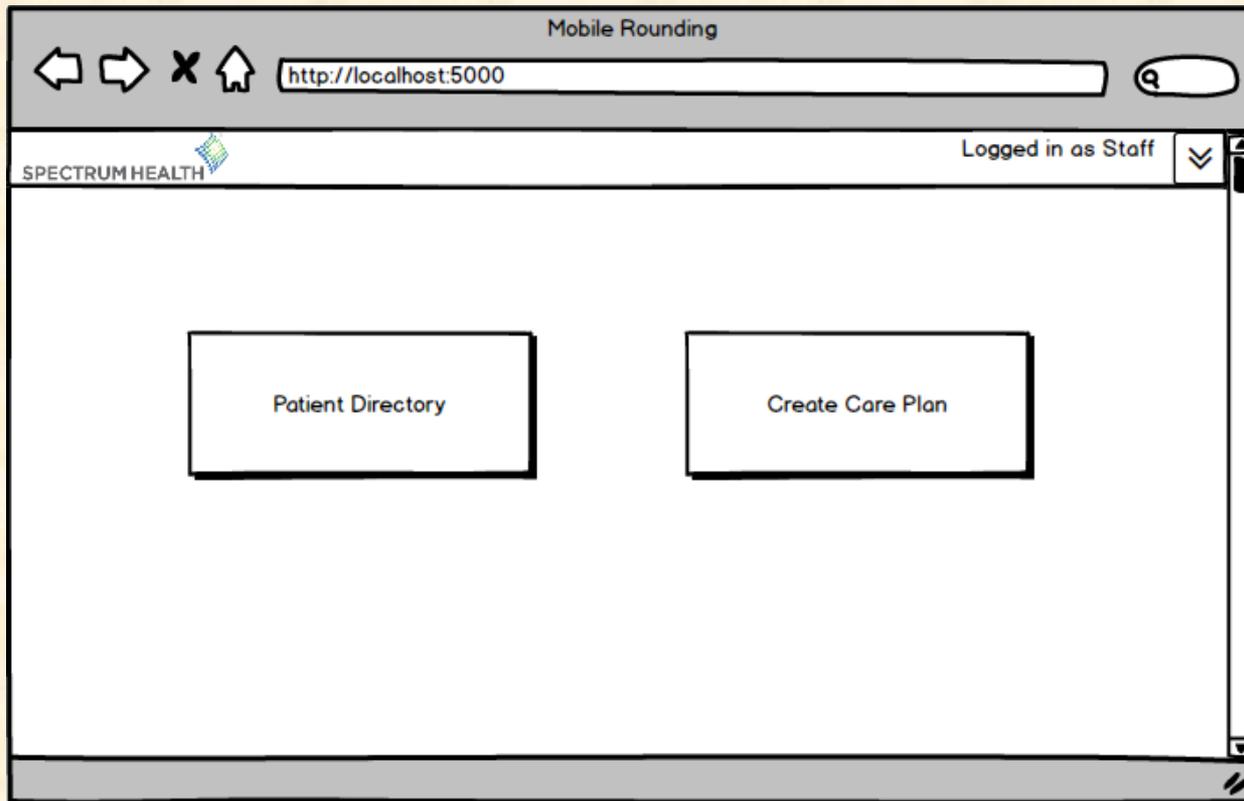

Design Specifications

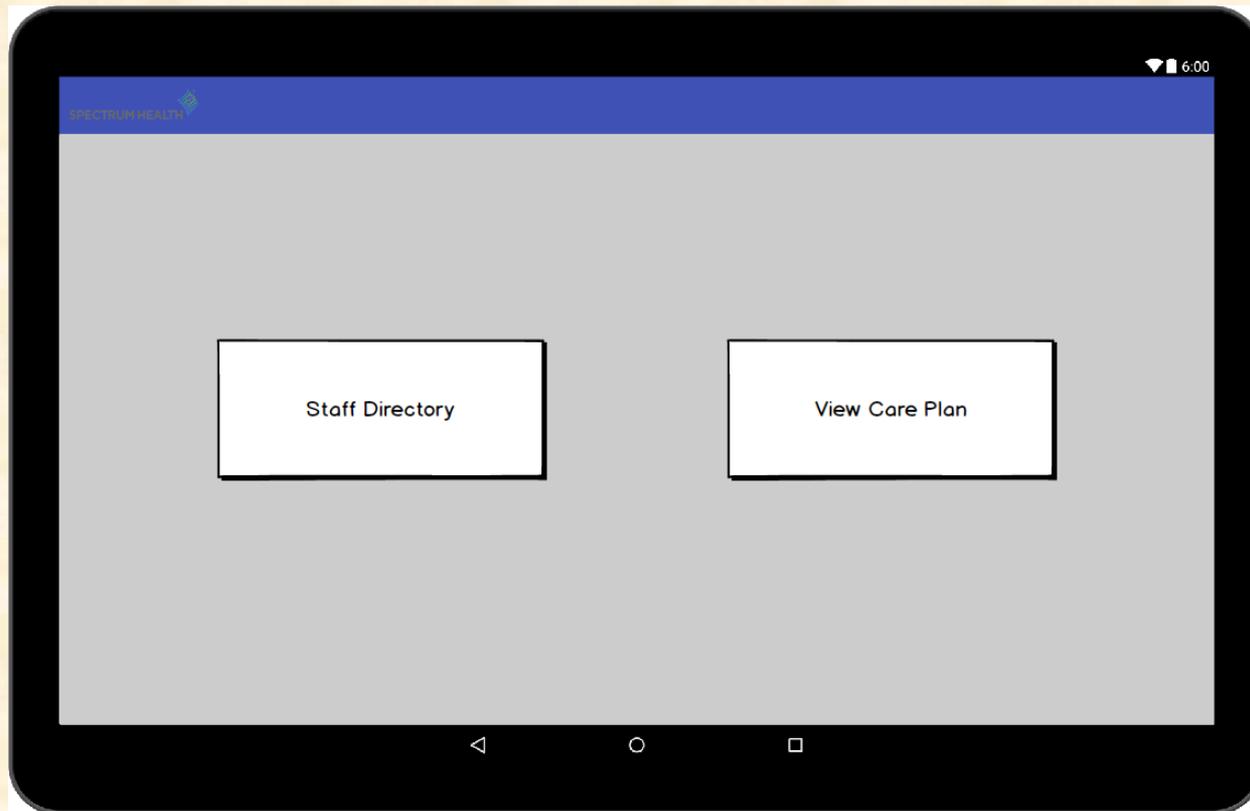

- 5 views for Staff Application – Home Screen, Create Care Plan, View Care Plan, Patient Directory, Video Call
- 4 views for Patient Application – Home Screen, View Care Plan, Staff Directory, Video Call
- Staff Application is intended for use on desktop but will be responsive
- Patient Application will be developed exclusively for Android devices

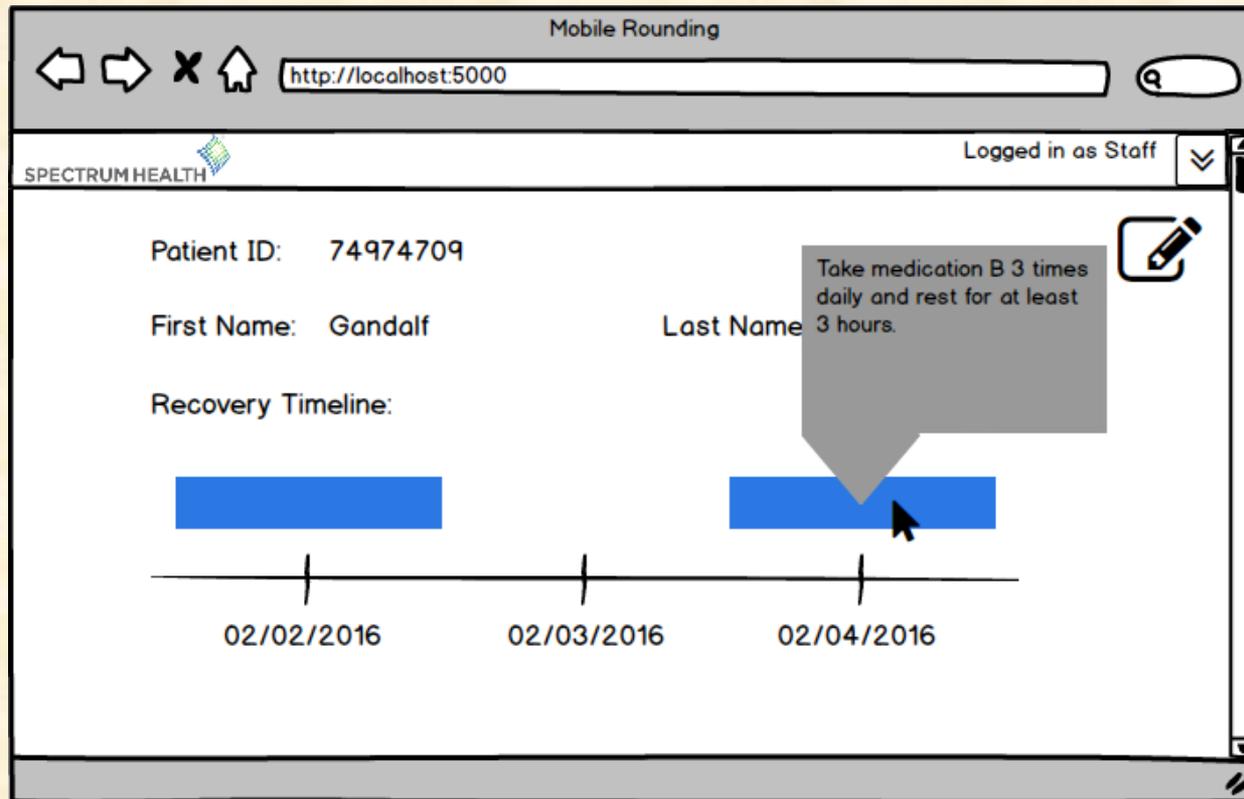

Screen Mockup: Home Screen (Staff Application)

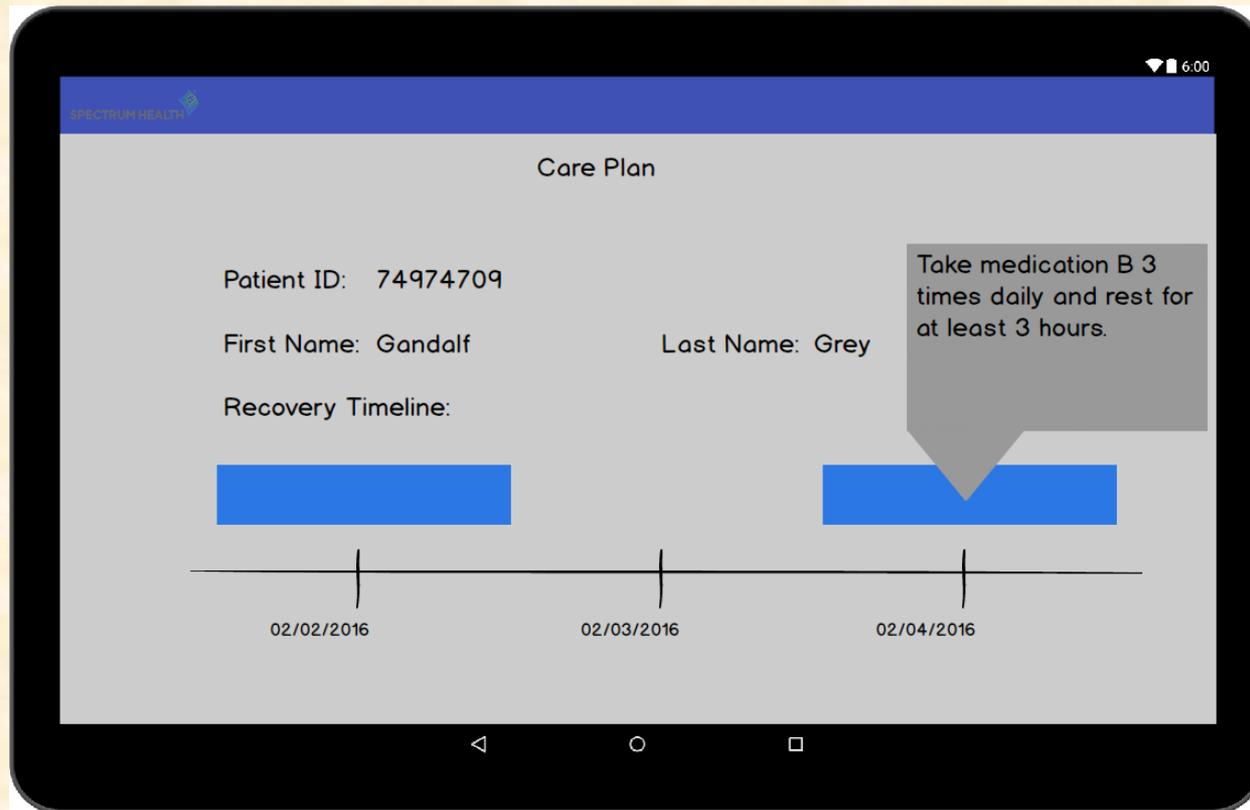

Screen Mockup: Home Screen (Patient Application)

Screen Mockup: View Care Plan (Staff Application)

Screen Mockup: View Care Plan (Patient Application)

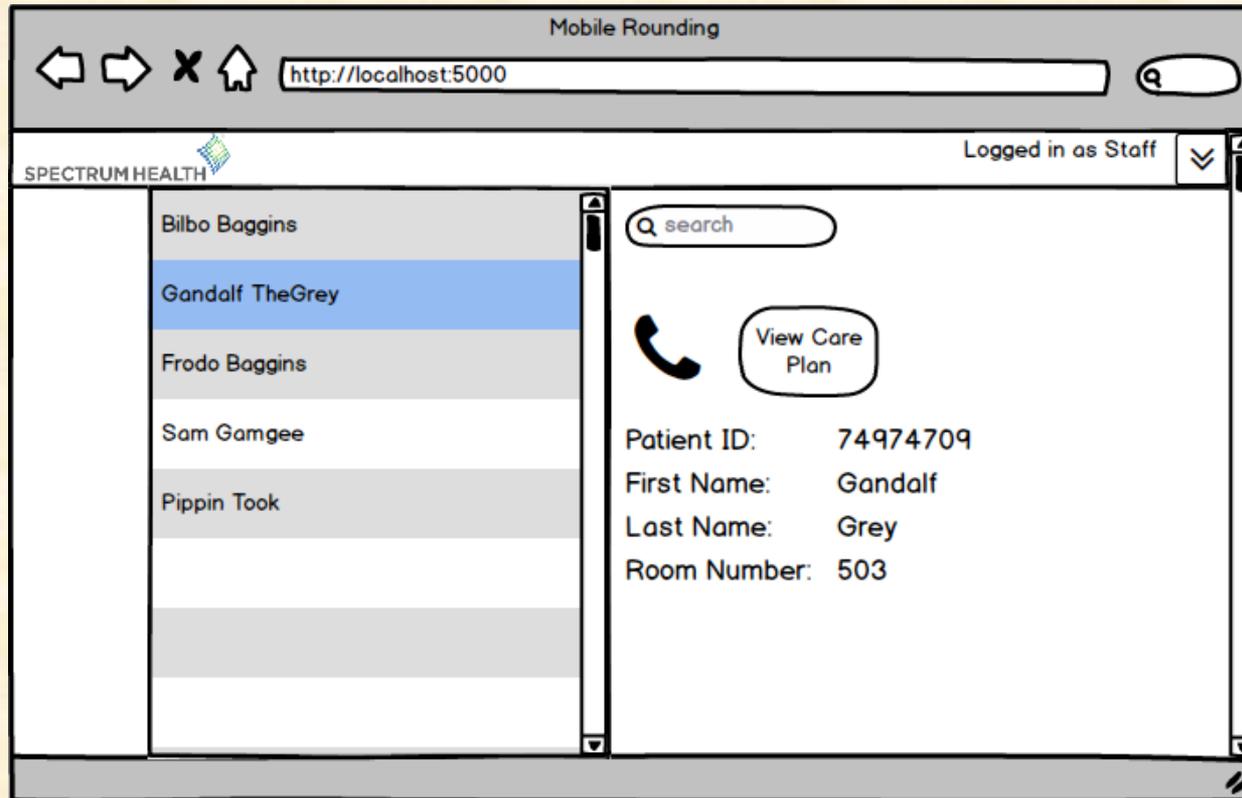

Screen Mockup: Create Care Plan (Staff Application)

The mockup shows a mobile application interface for 'Mobile Rounding'. At the top, there is a browser-like header with navigation icons (back, forward, close, home) and a URL bar containing 'http://localhost:5000'. Below the header, the 'SPECTRUM HEALTH' logo is on the left, and 'Logged in as Staff' with a dropdown arrow is on the right. A 'Save' button is located in the top right corner of the main content area. The form fields are as follows:

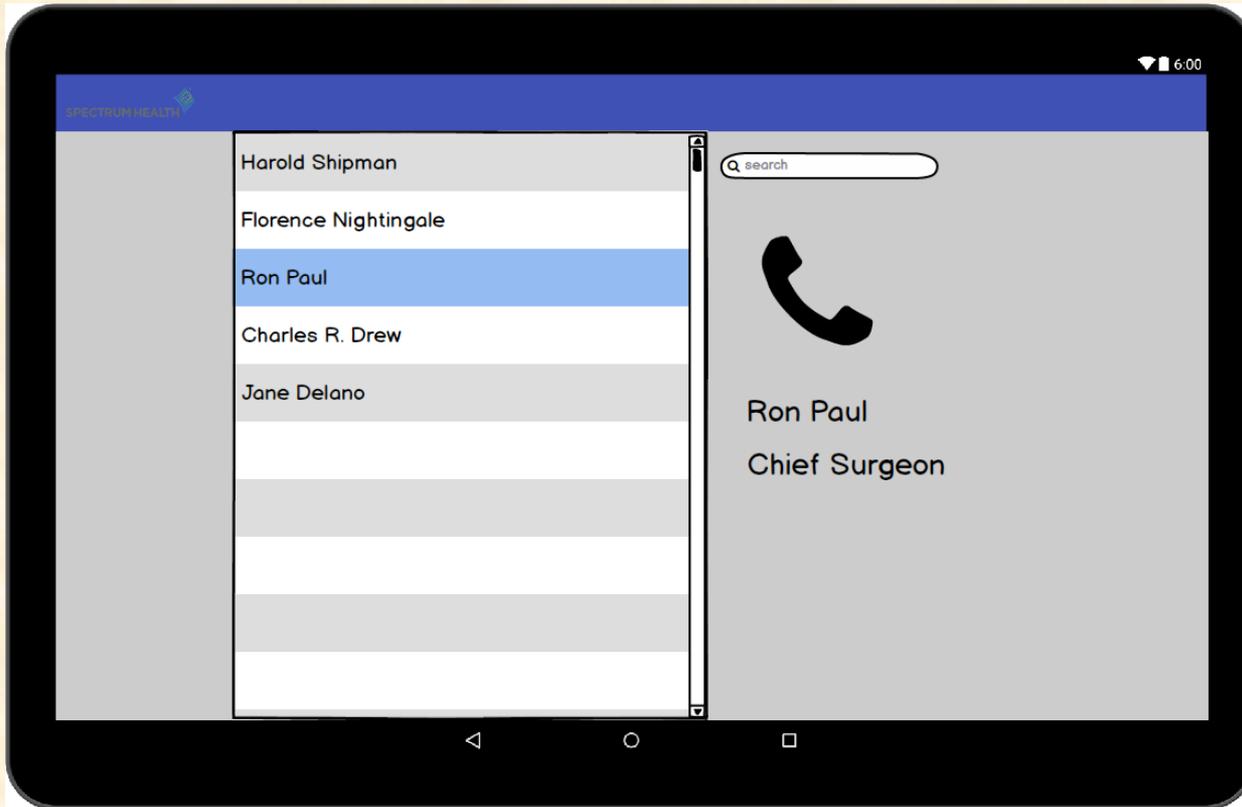

- Patient ID:
- First Name: Last Name:
- Timeline Events:
- Event 1 Date:
- Event 1 Date:

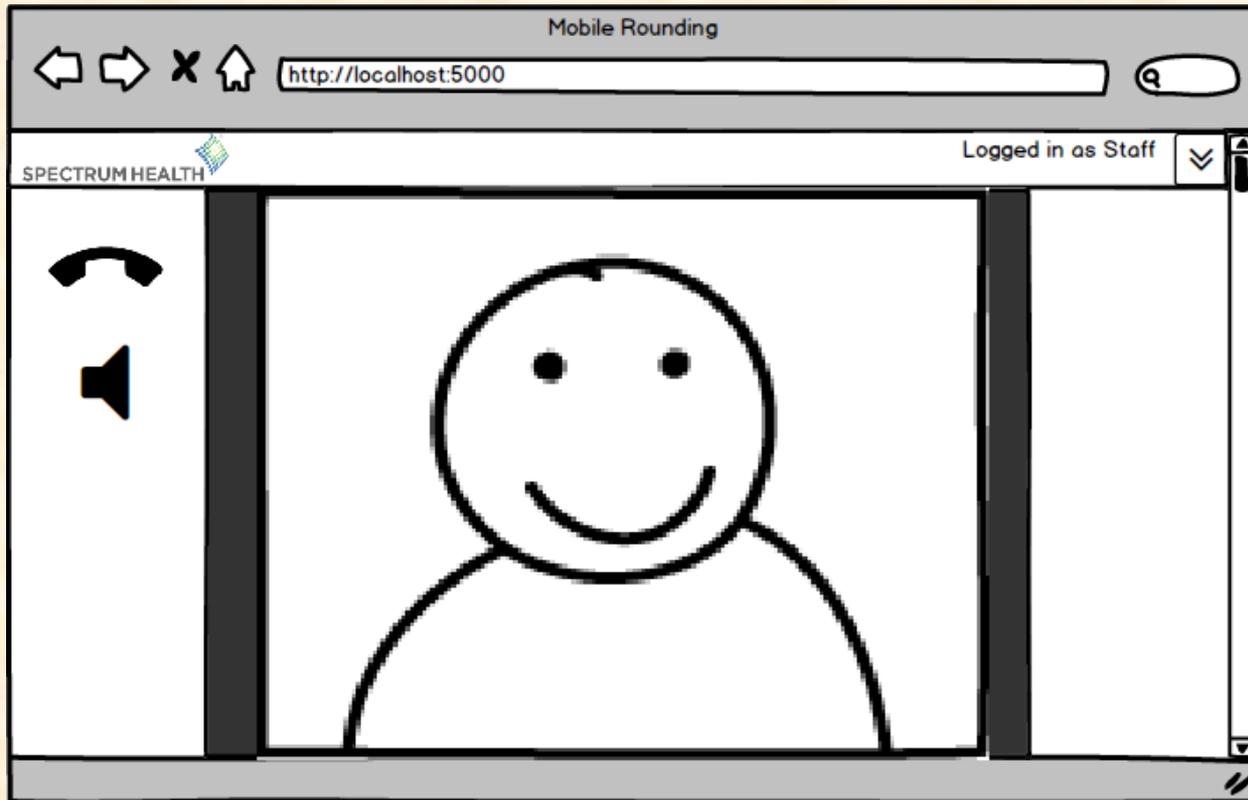

Screen Mockup: Directory View (Staff Application)

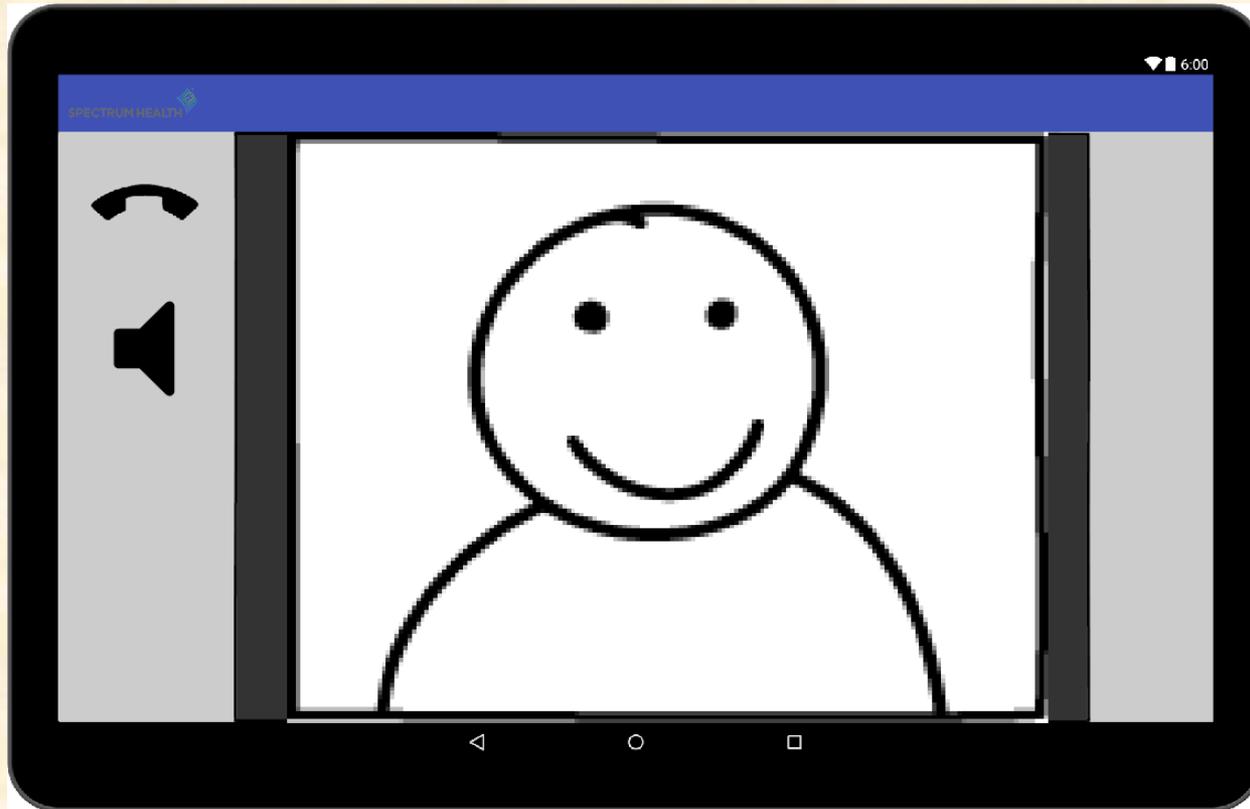

Screen Mockup: Directory View (Patient Application)

Screen Mockup: Video Call (Staff Application)

Screen Mockup: Video Call (Patient Application)

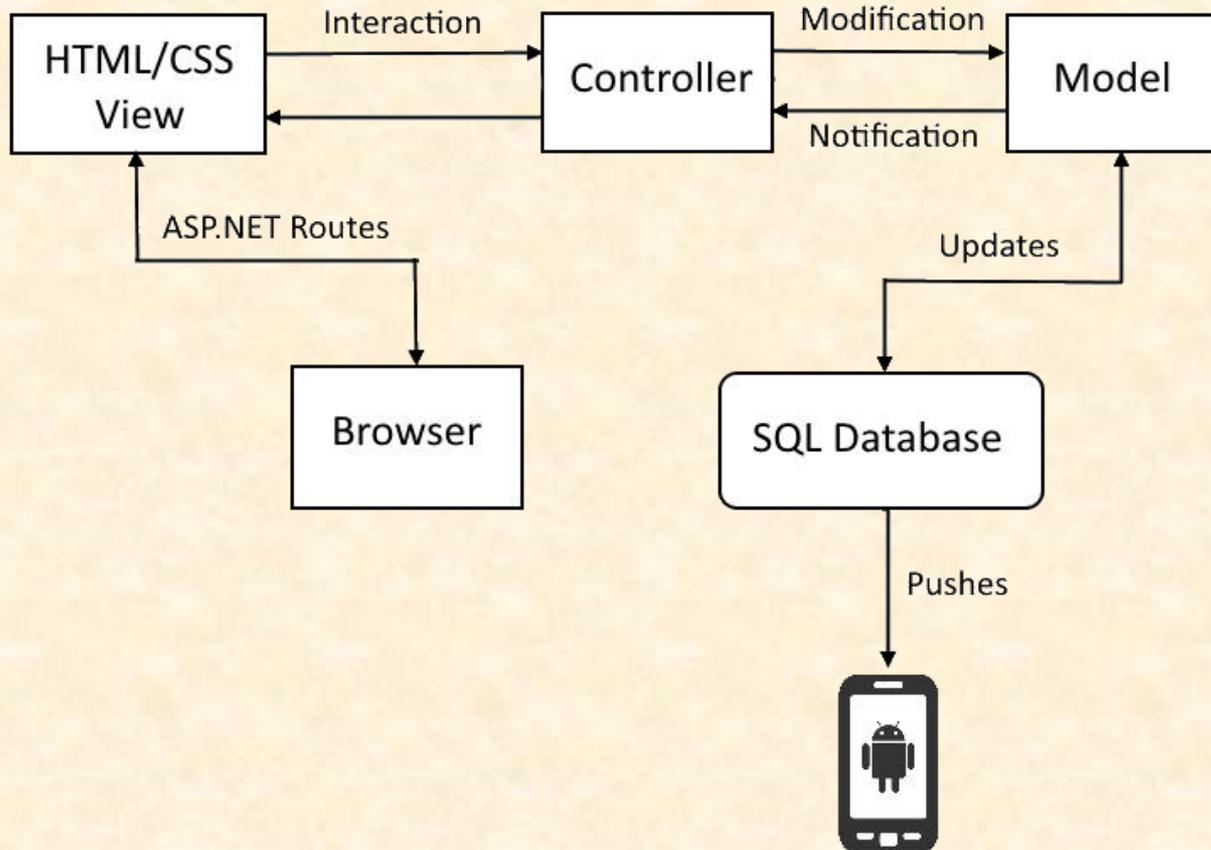

Technical Specifications

- Application follows MVC Design Pattern
- Data is pushed to SQL Server by Staff Application
- Data is retrieved from SQL Server by Patient Application
- Routing on Staff Application is provided by ASP.NET

System Architecture

System Components

- Hardware Platforms
 - Staff Application runs on any web browser
 - Patient Application runs on Android Tablet as provided by Spectrum Health
- Software Platforms / Technologies
 - Microsoft Visual Studio with ASP.NET 5 MVC
 - HTML/CSS + C#
 - Windows SQL Server 2012
 - Android Studio SDK with Java

Testing

- Manual Testing will be done to test functionality and user input
- Unit Testing will be done to test system components
- Visual Studio built in Testing Methods will be used for Unit Testing of the Staff Application
- JUnit and Mockito in Android Studio will be used for Unit Testing of the Patient Application

Risks

- Ensuring Secure Provider/Patient Messaging
 - Properly securing all personal/confidential patient records
 - Work directly with Spectrum to comply with patient confidentiality regulations
- Unfamiliarity with Vidyo Messaging API
 - Implementing preferred messaging API directly into mobile application
 - Consult Spectrum developers with knowledge of the API
- Overcommitting on Features
 - Not overdoing our workload to provide deliverables on-time
 - Prioritize feature list and commit to completing most important features first
- Lack of knowledge with ASP.NET MVC, SQL Server
 - Using current experience to develop with software never used before
 - Assign roles to all team members, utilize skill sets and knowledge of different team members to most effectively accomplish the tasks
