# Project Overview

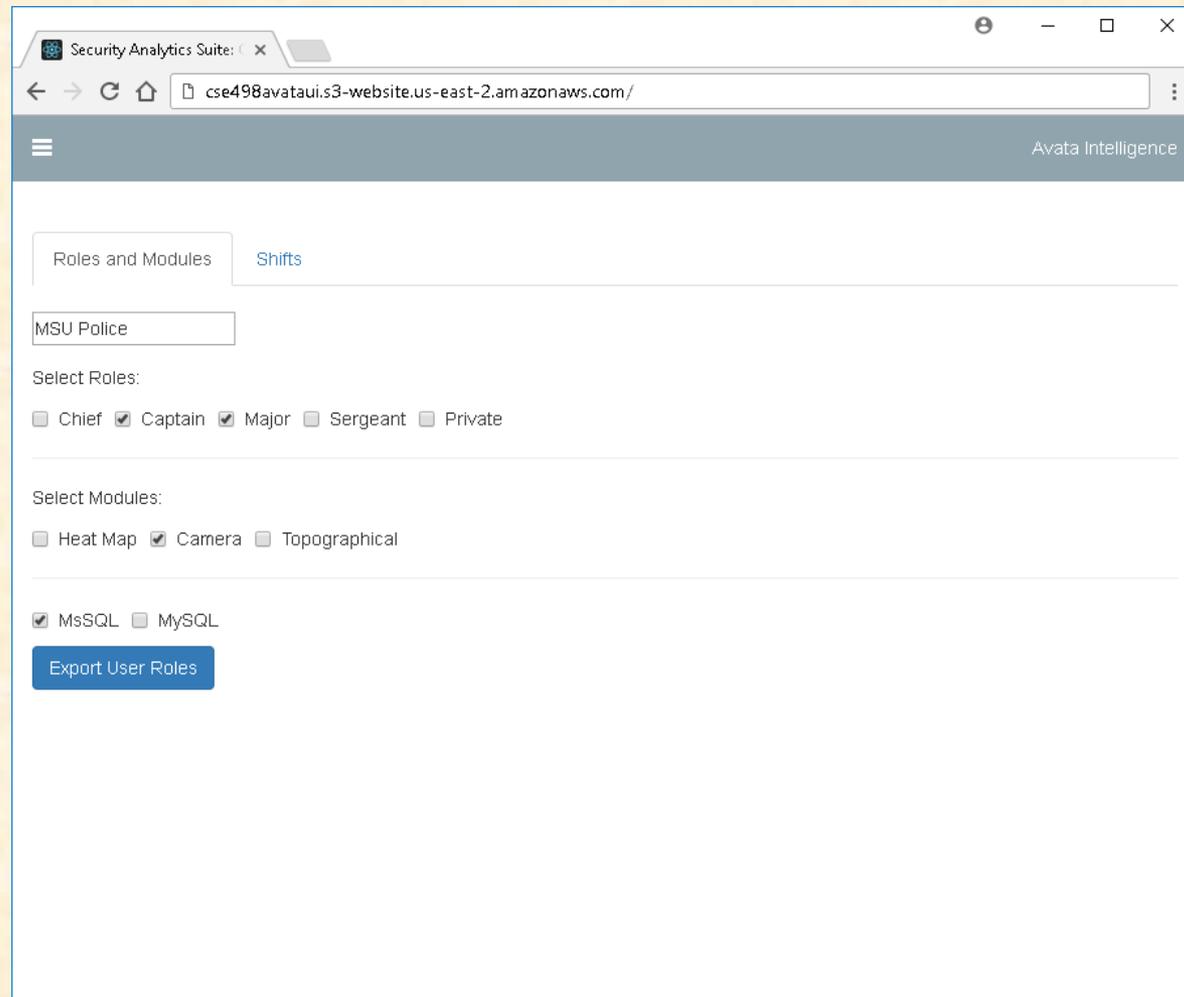

---

- Niche client base in police and law enforcement
- Reduce time it takes for Avata to onboard clients
- 3 modules to implement:
  - Client information
  - Geography
  - Taxonomy

# System Architecture

# Information: Roles & Modules

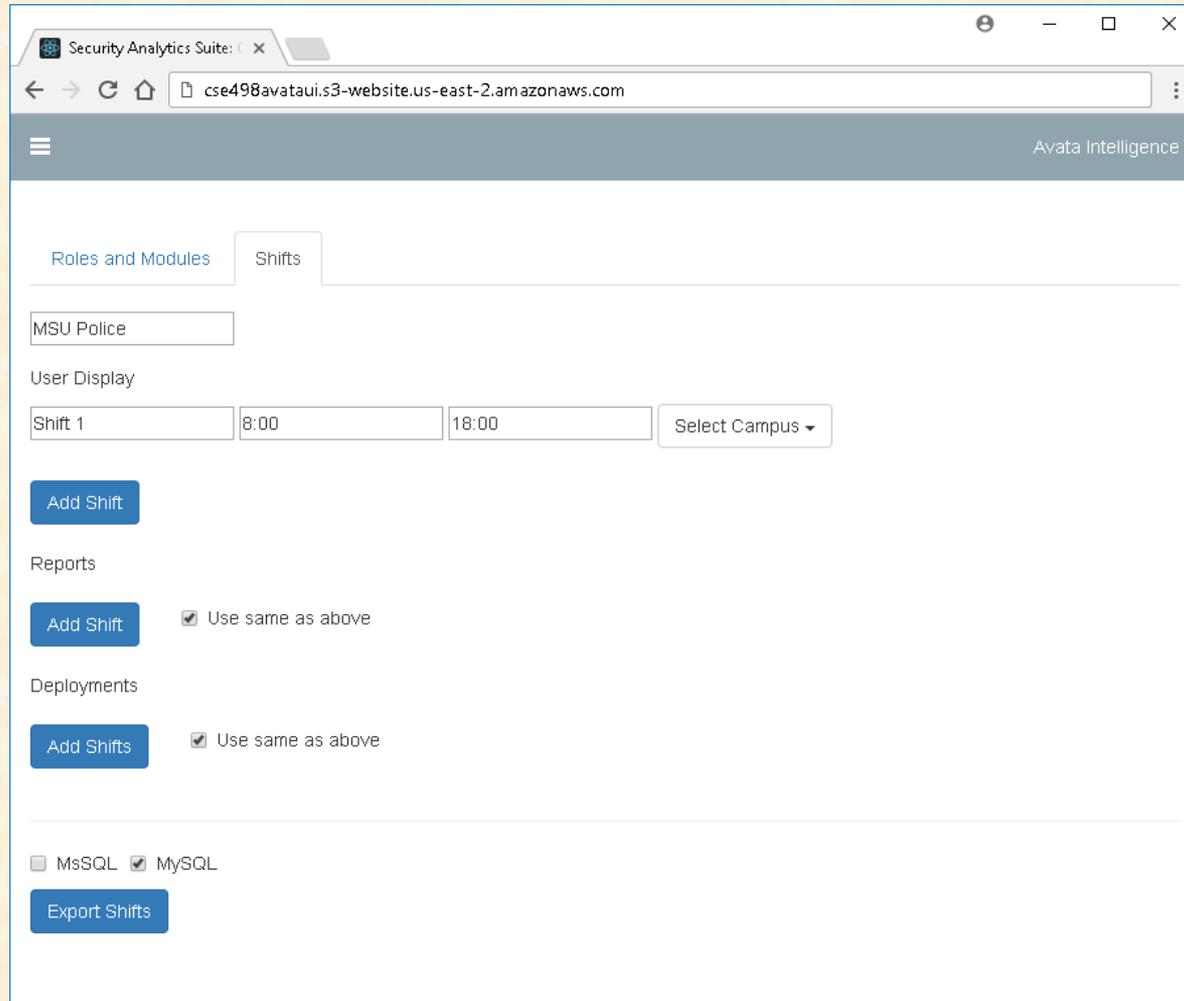

The screenshot shows a web browser window with the following elements:

- Browser Tab:** Security Analytics Suite
- Address Bar:** cse498avataui.s3-website.us-east-2.amazonaws.com/
- Header:** Avata Intelligence
- Navigation:** Roles and Modules (selected), Shifts
- Organization:** MSU Police
- Select Roles:**
  - Chief
  - Captain
  - Major
  - Sergeant
  - Private
- Select Modules:**
  - Heat Map
  - Camera
  - Topographical
- Database:**
  - MsSQL
  - MySQL
- Action:** Export User Roles (button)

# Information: Shifts

The screenshot shows a web browser window with the following elements:

- Browser Tab:** Security Analytics Suite: [X]
- Address Bar:** cse498avataui.s3-website.us-east-2.amazonaws.com
- Page Header:** Avata Intelligence
- Navigation:** Roles and Modules | Shifts
- Organization:** MSU Police
- User Display:** Shift 1 | 8:00 | 18:00 | Select Campus ▾
- Buttons:** Add Shift
- Reports:** Add Shift  Use same as above
- Deployments:** Add Shifts  Use same as above
- Database:**  MsSQL  MySQL
- Buttons:** Export Shifts

# Geography: Campuses

# Geography: Beats

The screenshot displays the Security Analytics Suite interface. The main window shows a map of East Lansing, Michigan, with various streets and landmarks labeled. A large blue-shaded area represents a campus or beat, with several sub-beats outlined in black. The interface includes a browser window at the top with the URL `cse498avataui.s3-website-us-east-2.amazonaws.com/?firstname=#`. On the right side, there is a control panel with the following sections:

- Layer Options:** Buttons for **Campus**, **Beat**, and **Sub Beats**.
- Feature Options:** Buttons for **Cut**, **Merge**, and **Free Hand Cut**.
- Import KML File:** Two input fields labeled **Add Beat KML** and **Add Sub-Beat KML**, each with an **Import** button.
- Hierarchy:** A list showing a tree structure:
  - Campus 1
    - Beat 1
    - Beat 2
    - Beat 3
  - Campus 2
- Submit:** A green button at the bottom.

# Geography: Sub-Beats

Security Analytics Suite: X  
cse498avataui.s3-website-us-east-2.amazonaws.com/?firstname=#

Avata Intelligence

Click a campus or beat to cut. Once selected, click outside of the item to begin the cut. Any sub-beats affect will be redrawn to match the parent beat.

# Taxonomy: Categories

The screenshot displays the Avata Intelligence Security Analytics Suite interface. The browser address bar shows the URL `cse498avataui.s3-website.us-east-2.amazonaws.com/#`. The page header includes a menu icon and the text "Avata Intelligence".

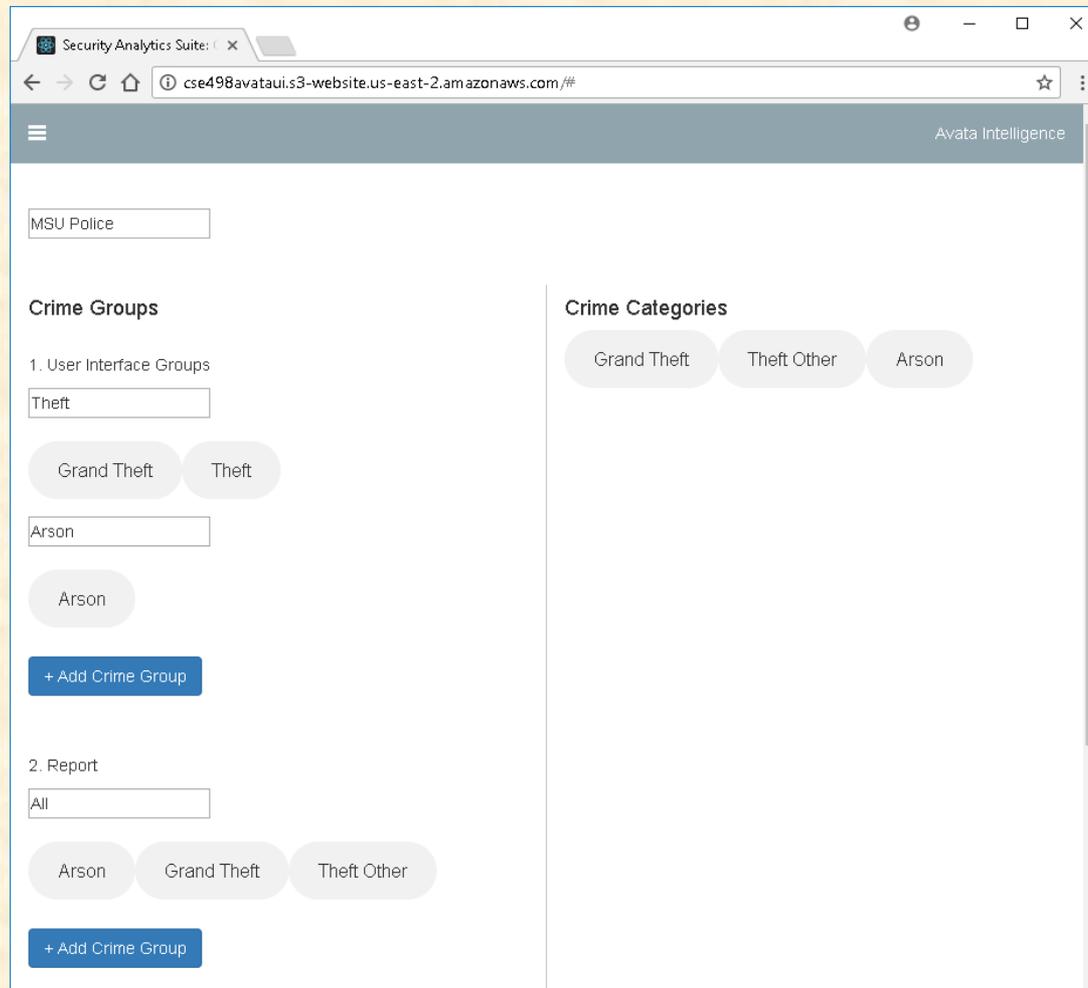

The main content area is divided into two sections:

- Crime Categories:** This section features a search input field containing "MSU Police". Below it, a list of crime categories is shown, each with a search input field and a list of associated crime types in rounded buttons:
  - Grand Theft:** Search input "Grand Theft", crime types: "THEFT GRD", "G THEFT".
  - Other Theft:** Search input "Other Theft", crime types: "THEFT ATT", "THEFT PER", "THEFT PTY", "INET THEFT", "ID THEFT", "PET THEFT".
  - Arson:** Search input "Arson", crime types: "REG ARSON", "FIRE ARSON", "ARSON", "ARSON SUSP".
- Crime Types:** This section displays a grid of individual crime types in rounded buttons, including: "DEFAULT", "PROSTITUTE", "AO MISD", "TEST", "OBSCENE", "COUNTY ORD", "JV TRUANT", "ABUSE PHYS", "EMBEZZLE", "MAL MISCH", "CITE BK RQ", "JV CURFEW", "Y", "TA HR MIS", "1182H-R", "MANSLTR", "MURDER ATT", "CHILD ENDG", "DUI ALCOHO", "DUI DRUG", "DUI COMBO", "TC DUI ALC", "TC DUI DRU", "BURG FRAUD", "LICENSE", "GRAFFITI", "ASSIST CIT", "SEX REG", "FIRE ARSSU", "VEH REC", "CO VIOL", "X", "MUNI VIOL", "CRT ORD BK", "BURG STORC".

At the bottom of the "Crime Categories" section, there is a blue button labeled "+ Add Crime Category" and a "Next" button.

# Taxonomy: Groups

# What's left to do?

- Geography back-end validation
- Add different colors to different campuses
- Allow for editing features of campus
- Link polygons to string tree structure
- Add freehand drawing/cutting
- Polishing user interface
- Bug fixes
- Integration Testing
