Pierce Neal

Department of Computer Science and Engineering

Michigan State University

Spring 2018

*From Students...  
...to Professionals*

# Functional Specifications

- Mobile App for Real-Time Hospital Navigation
  - Poster waypoints guide a user through routes
  - Routes direct users between major locations
  - Routes recalculate if user scans off-route waypoint
- Web App for Managing Waypoints and Routes
  - Routes are all preconfigured
  - Waypoints can be added and deleted
  - Web app primarily used by administrative assistants and secretaries

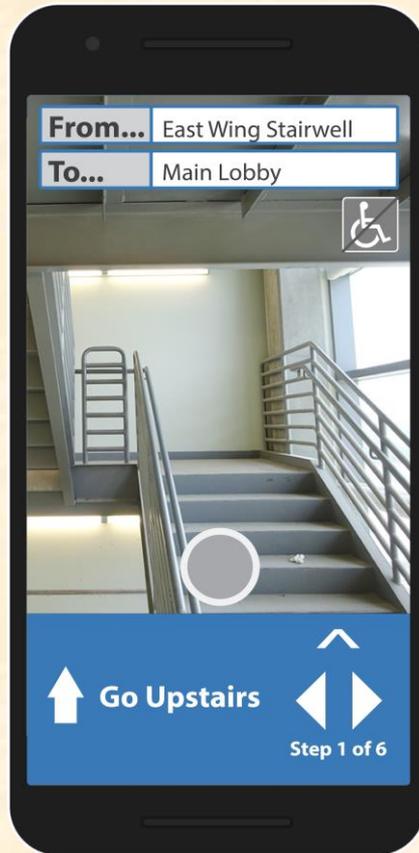

# Design Specifications

---

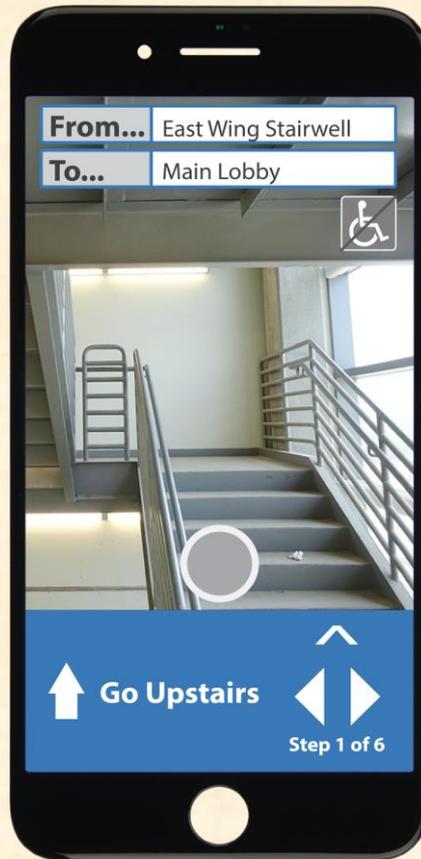

- QR codes on posters called waypoints
- App to navigate through Spectrum Health Facilities using waypoints, even without wi-fi
- Web application for staff to create new waypoints, track user routes

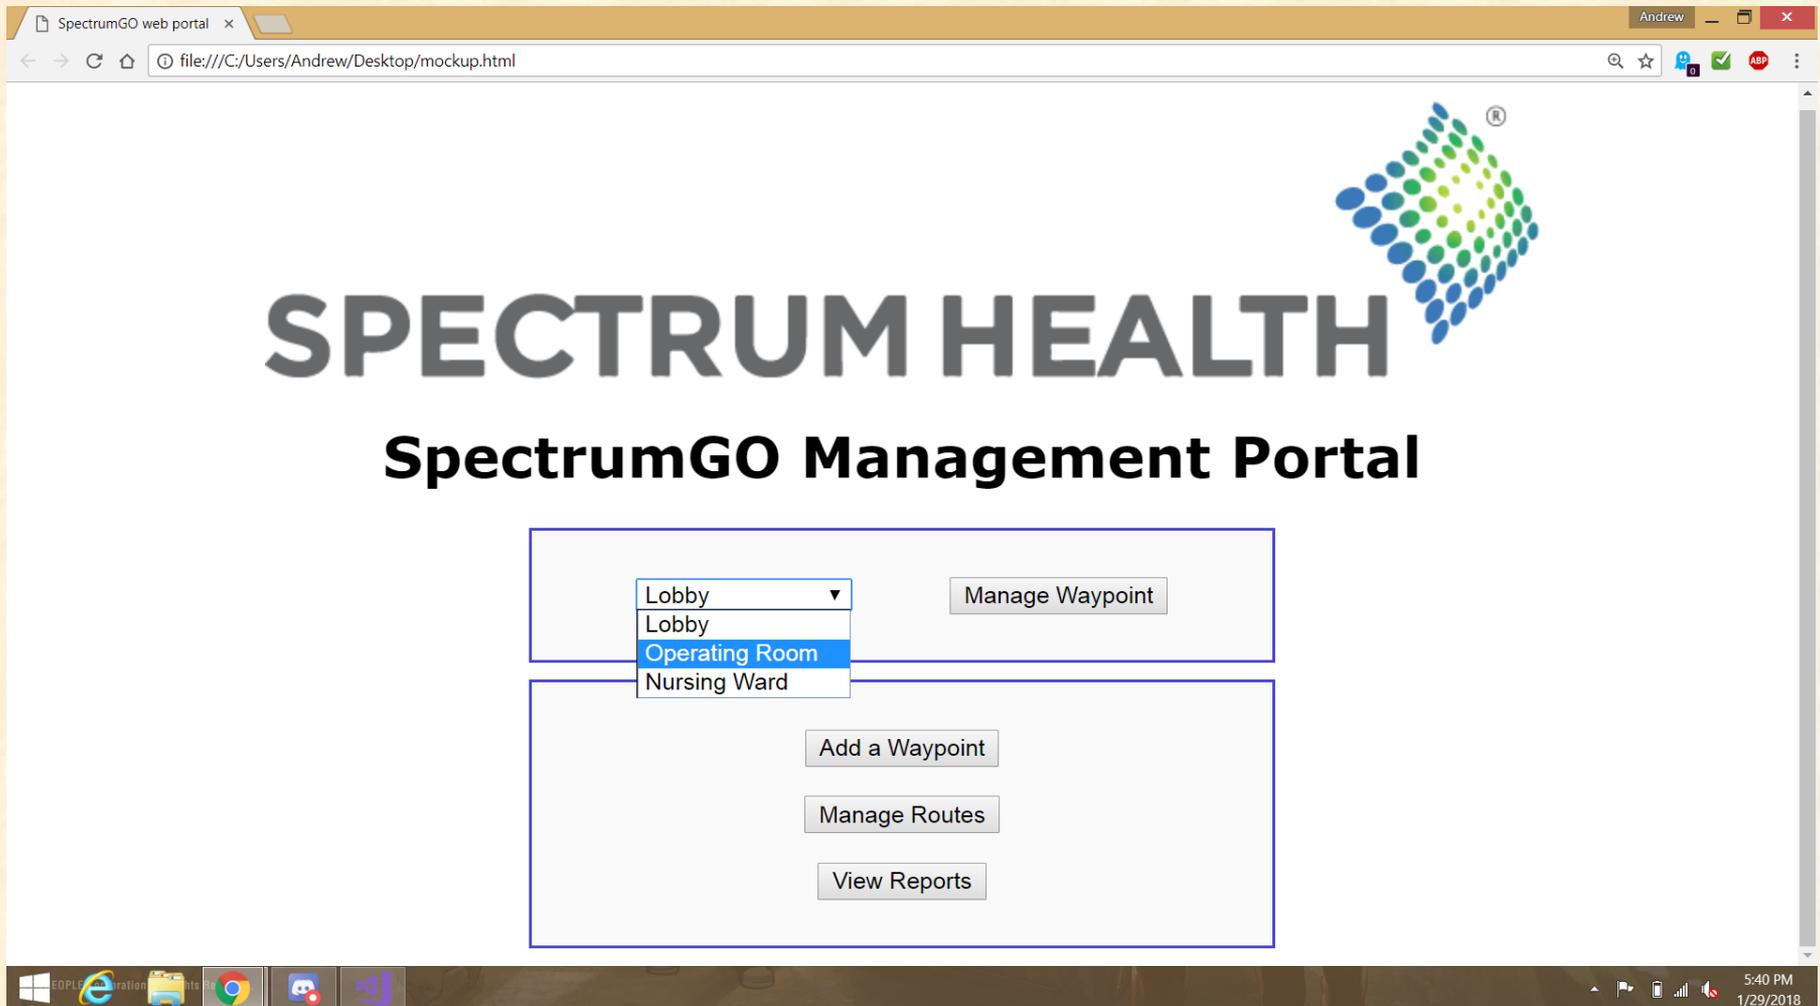

# Screen Mockup: Android App

# Screen Mockup: iOS App

# Screen Mockup: Web App

# Screen Mockup: Web App

## SPECTRUM HEALTH

### SpectrumGO LOBBY Waypoint

#### Paths

To Operating Room	Update
Directions: Turn left, Walk forward until	Angle: -90
To Nursing Ward	Update
Directions: Turn right, Walk forward an	Angle: 90
To Cardiology	Update
Directions: Turn around, Take the first	Angle: 180
To Pharmacy	Update
Directions: Take the staircase on your	Angle: 45

Add

Delete

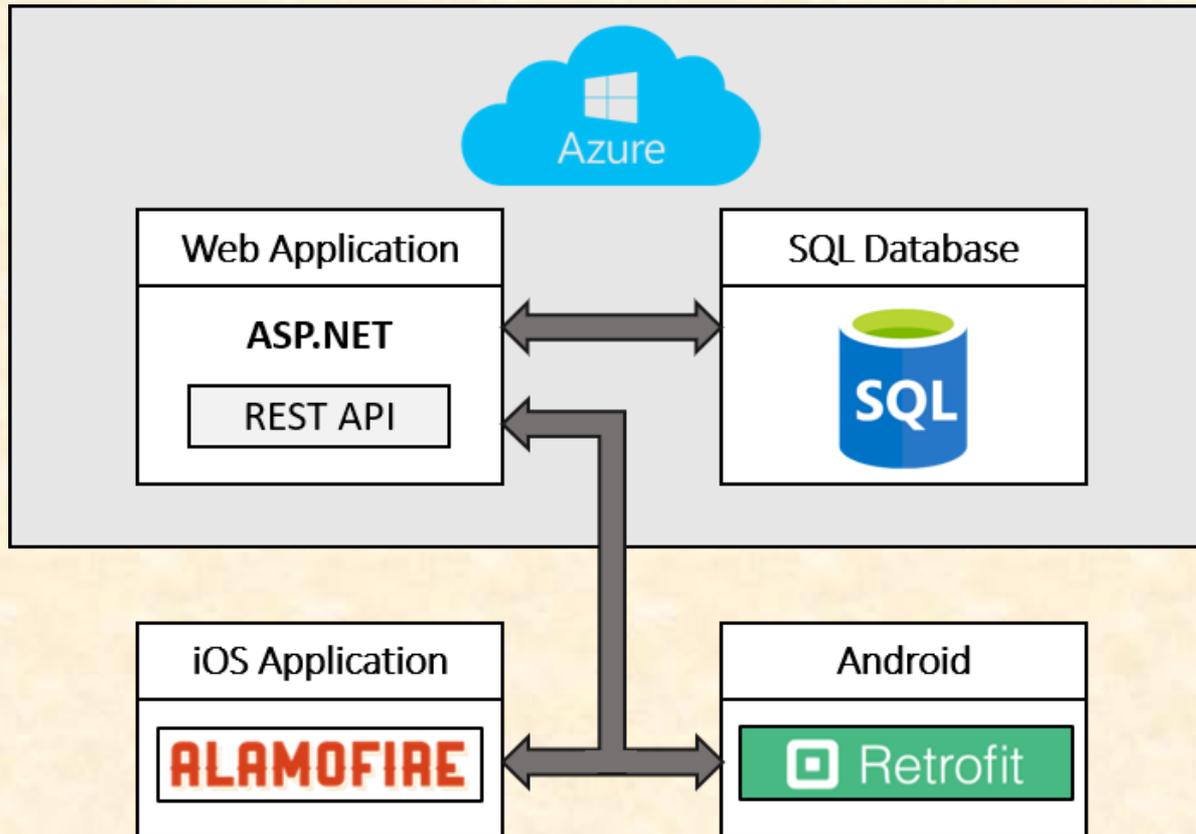

# Technical Specifications

---

- SQL database on Microsoft Azure to store waypoints and routes
- Barcode detection with Mobile Vision API to scan QR codes (Android)
- Retrofit and Alamofire for HTTP requests from mobile devices

# System Architecture

# System Components

- Hardware Platforms
  - Android Phones
  - Apple iOS phones
- Software Platforms / Technologies
  - Android SDK (Java)
  - iOS SDK (Swift)
  - HTML5 / CSS
  - .NET Core 2.0 MVC (C#)
  - Microsoft SQL / Azure

# Risks

- Risk 1
  - AR arrow will be difficult to implement and not compatible with all devices
  - Develop a simpler but functional solution
- Risk 2
  - Integration of database with web and mobile applications
  - Research integration techniques
- Risk 3
  - QR code and .pdf generation
  - Research APIs and Tutorials, clear libraries with client
- Risk 4
  - Database download size could be too large for mobile app
  - Allow user to download only the current facility
