Department of Computer Science and Engineering

Michigan State University

Spring 2019

*From Students...
...to Professionals*

Functional Specifications

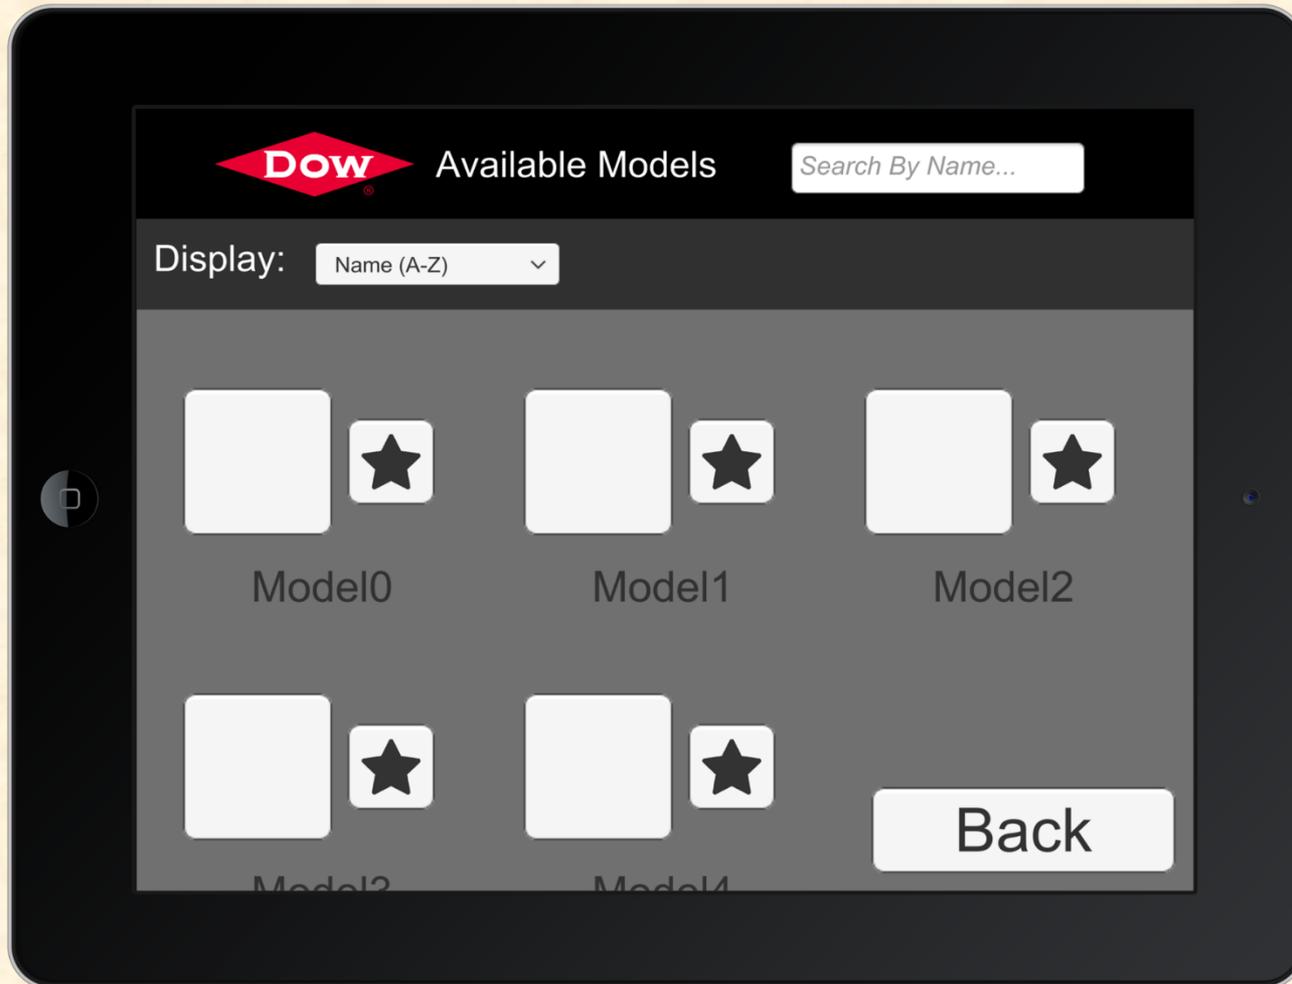

- Augmented Reality iOS and Android Application
- Platform Allowing Marketing Professionals to View Dow Product Models
- Models are Managed and Updated from Central Storage

Design Specifications

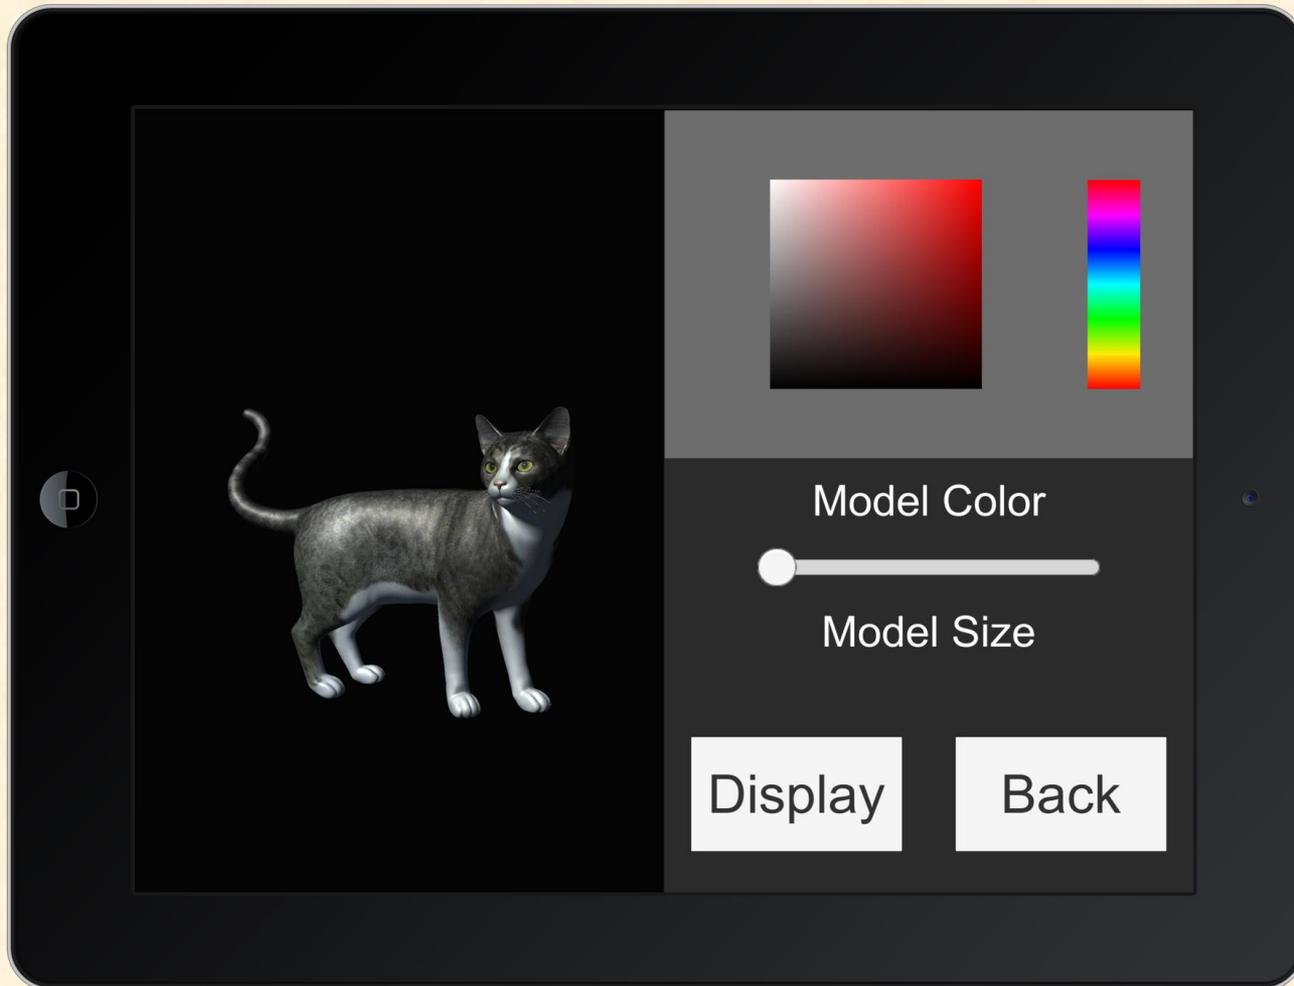

- View Dow Models in AR
- View All Available Models in the Cloud
- Configure the Model's Color and Scale
- Rotate and Highlight Models
- Show User Info and User Settings
- Tutorial Screen

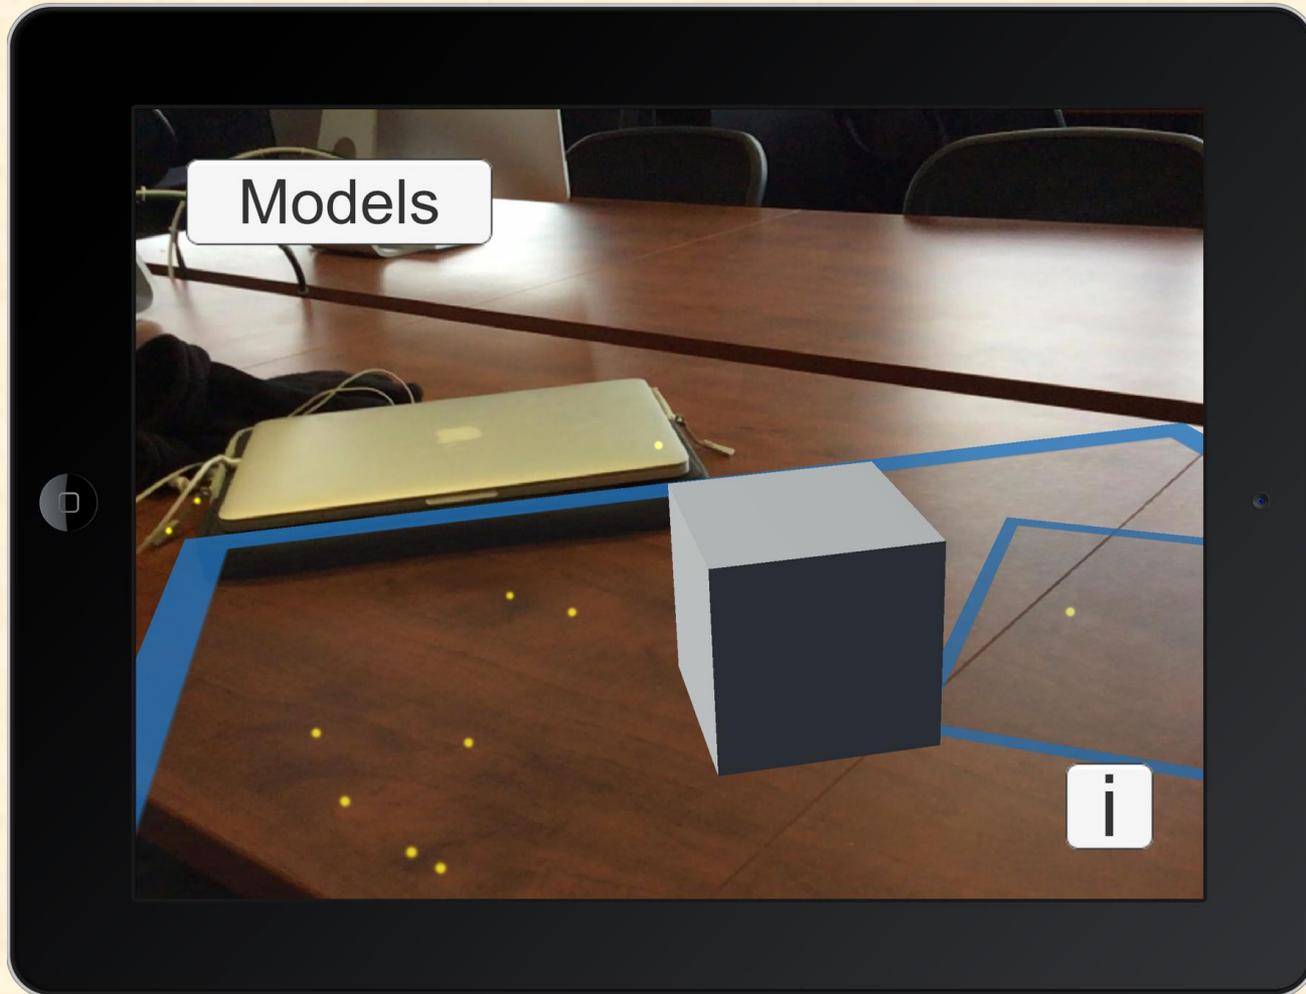

Screen Mockup: Model Selection

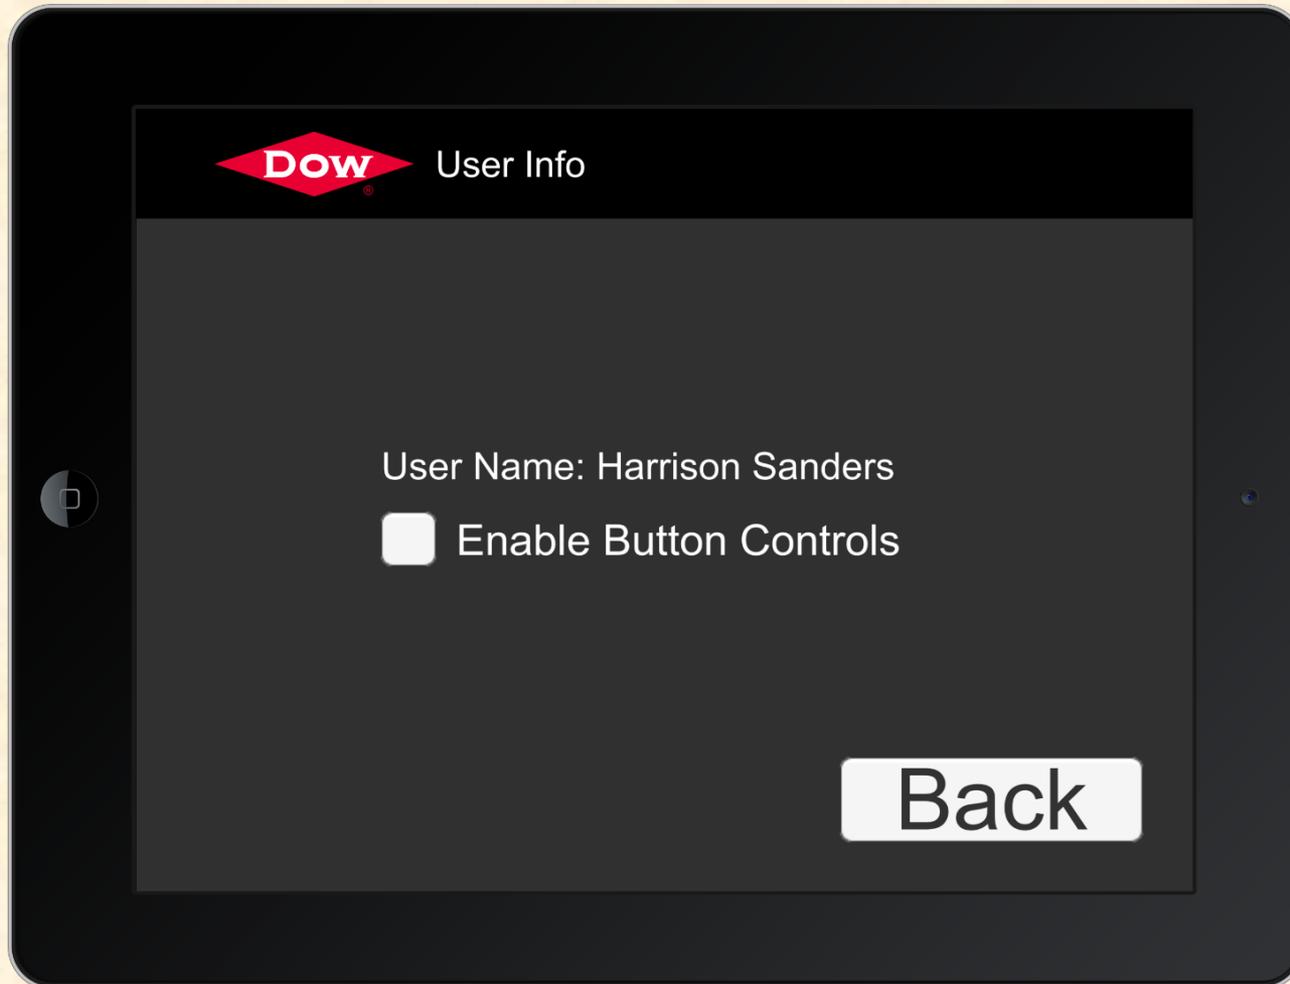

Screen Mockup: Model Configuration

Screen Mockup: AR View

Screen Mockup: User Info

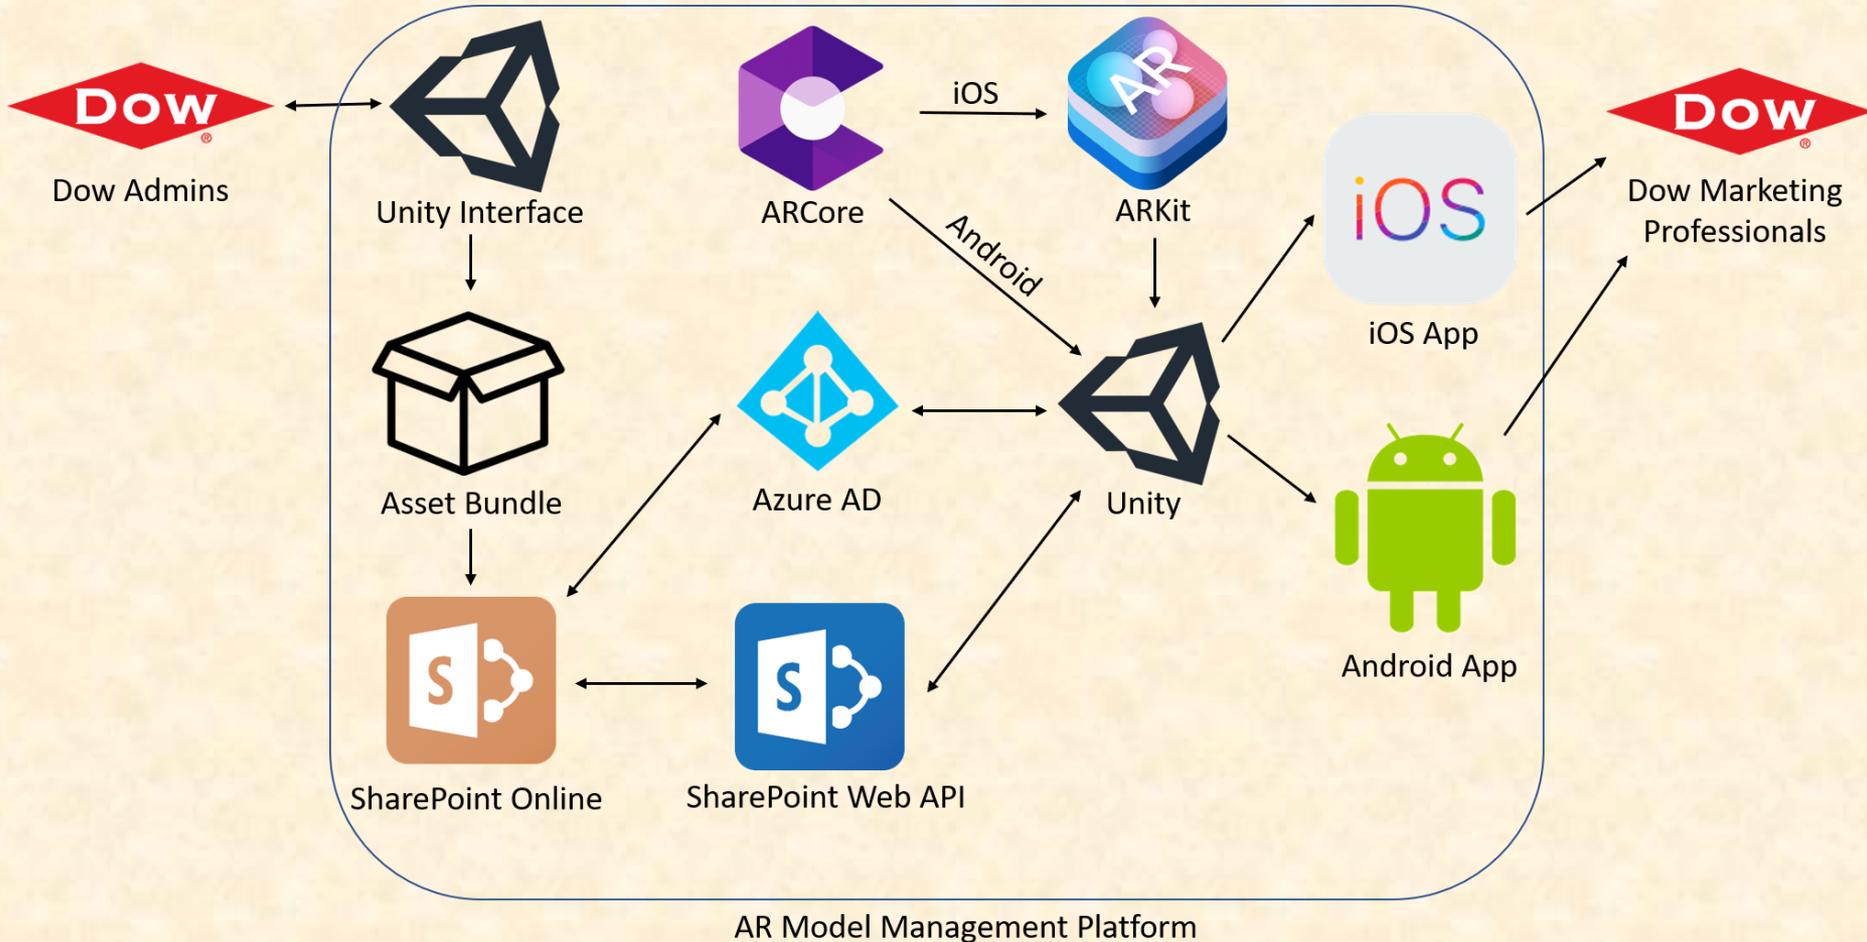

Technical Specifications

- Azure Active Directory
- SharePoint Web API
- Unity AssetBundles
- ARCore (iOS and Android) and ARKit (iOS)
- OAuth 2.0 Token Interceptor

System Architecture

System Components

- Hardware Platforms
 - iOS Devices
 - Android Devices
- Software Platforms / Technologies
 - iOS
 - Android
 - Unity
 - Xcode
 - C #

Risks

- Implementation of ARCore and ARKit
 - Using ARCore with ARKit and allowing for user interaction with 3D objects is a challenge
 - Mitigate by having each team member create an ARCore/ARKit app
- Storing 3D models on SharePoint
 - SharePoint needs to store large 3D models
 - Mitigate by creating a test app that pulls a 3D model from SharePoint
- Scalability on SharePoint
 - The app will be used by entirety of Dow Sales and Marketing
 - Mitigate by stress testing on SharePoint
- Safety of handling user credentials
 - Hard to keep user login info safe when there are many different access points
 - Mitigate by working with Dow on safety best practices with Azure AD
