...to Professionals*

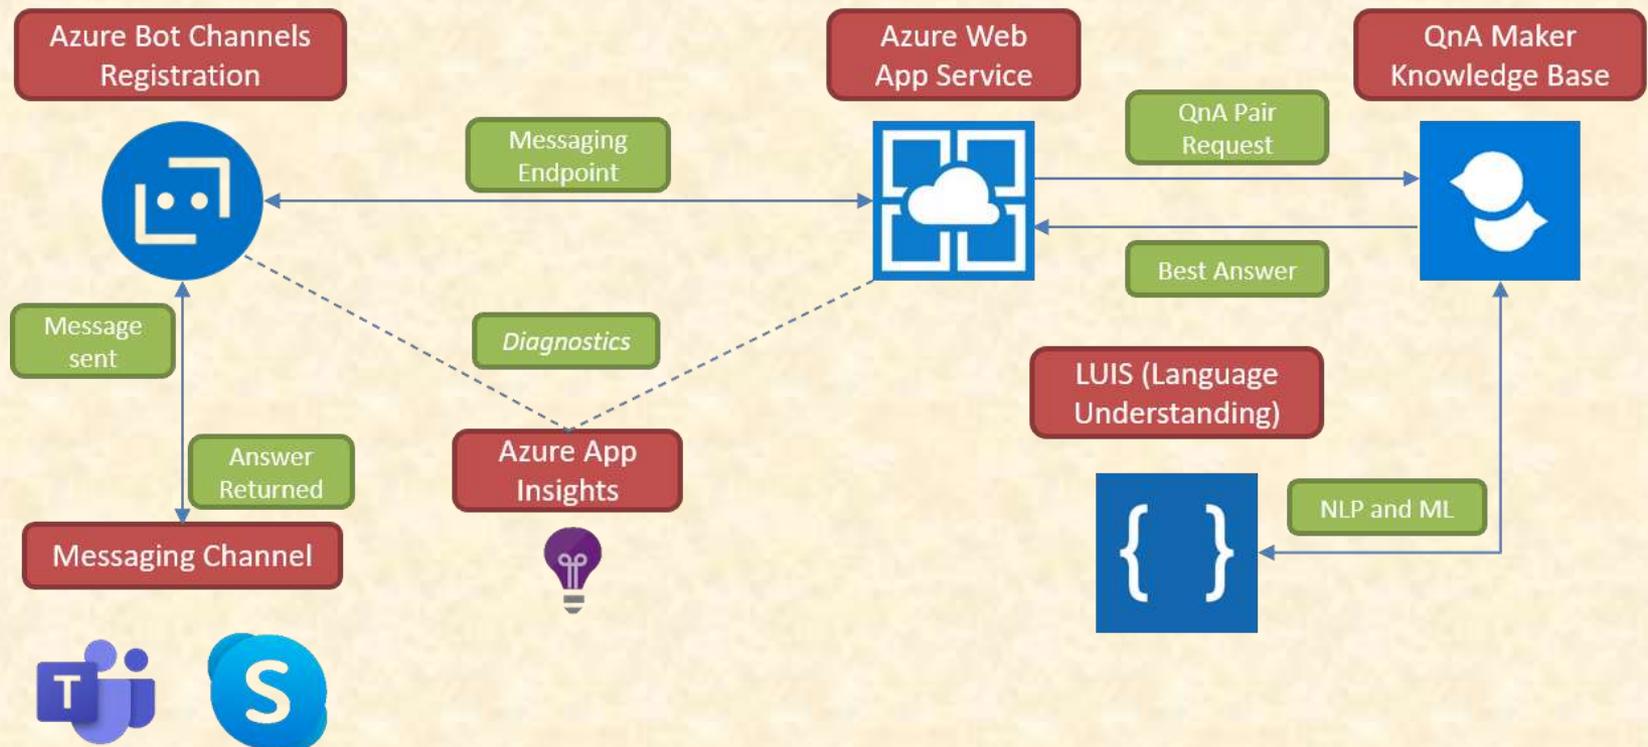

Project Overview

- The Meijer Support Team regularly receives over 500+ calls a day
- Chatbot allows IT associates to give attention to other escalated issues
- Pulls solutions from support documents and templates
- Incident tickets created accordingly

Incident Ticket Email Template

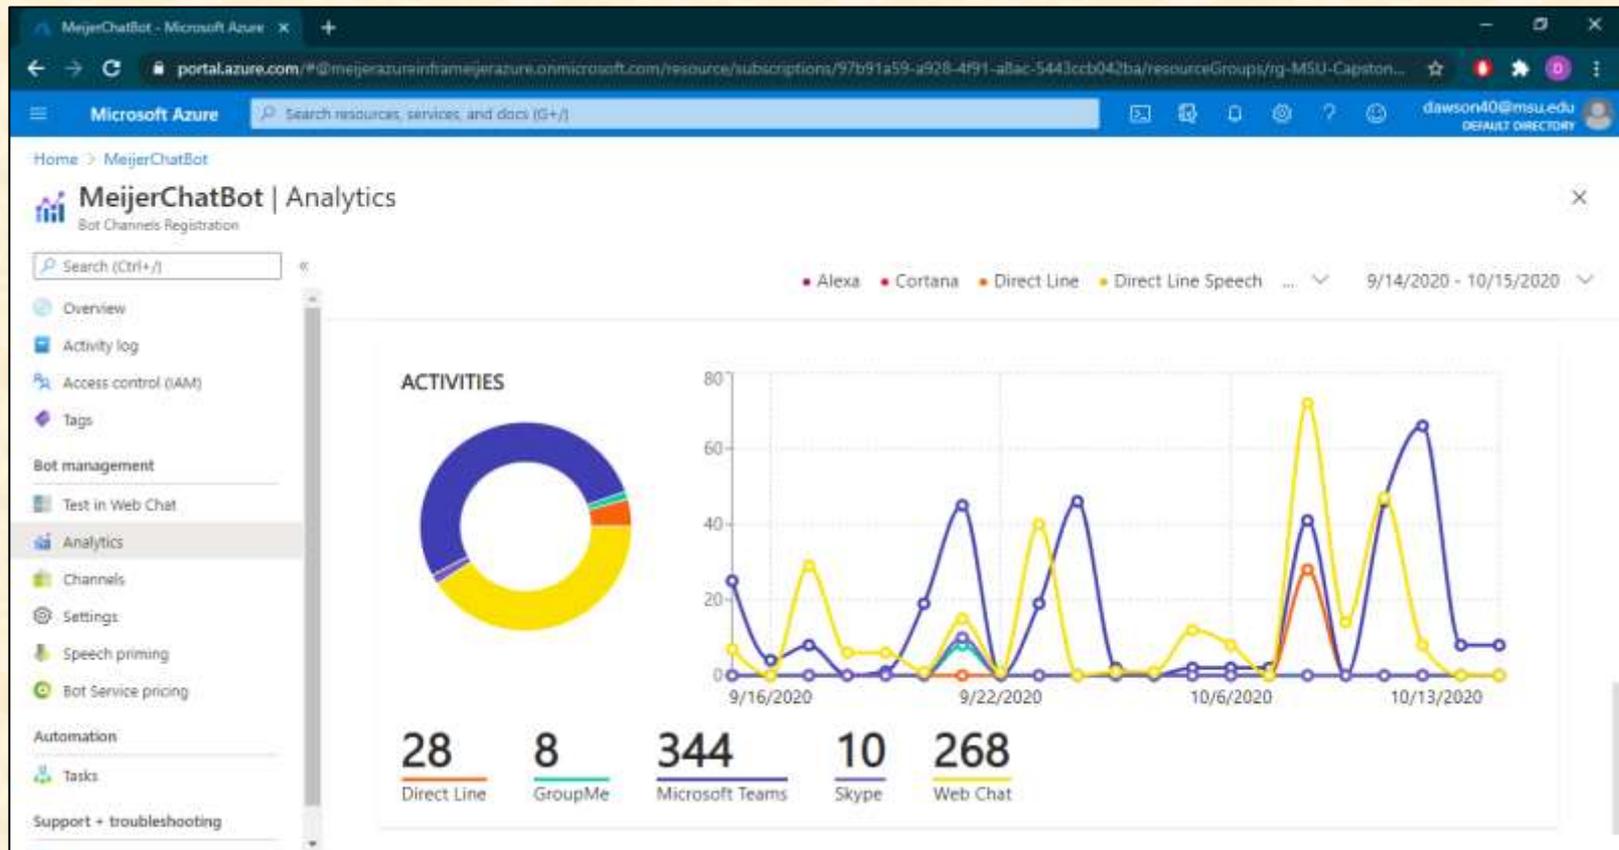

QnA Maker

The screenshot displays the QnA Maker web interface. At the top, there are navigation tabs for 'EDIT', 'PUBLISH', and 'SETTINGS', along with buttons for 'Save and train' and 'Test'. The main area is divided into three columns:

- Left Column (Published KB IT):** Shows a chat history. A question is displayed in a black box: "Some of my account info is wrong on Workday and I don't know how to change it." Below it, a grey box contains the answer: "When personal information on Workday is incorrect and needs to be changed, you must complete a Data Correction Request form in Workday. If you are unfamiliar with how to do this, check out this guide: [Data Correction Request in Workday](#)". There are two buttons: "Yes, thank you!" and "No, keep looking for solutions." A response "qna (Test) at 12:23 PM" shows the user selected "Yes, thank you!".
- Middle Column (Inspect):** Labeled "Inspect", it shows the "Question" and "Add alternative phrasing" options. The question text is "Some of my account info is wrong on Workday and I don't know how to change it." There is an input field for "Add alternative phrasing" with a placeholder "Add alternative here".
- Right Column (Answer):** Labeled "Answer", it shows the system's response: "Choose the most appropriate answer: When personal information on Workday is incorrect and needs to be changed, you must complete a Data Correction Request form in Workday. If you are unfamiliar with how to do this, check out this guide: [Data Correction Request in Workday](https://meijer365.sharepoint.com/sites/ITSupport/ServicesWiki/SitePages/Data-Correction-Request-in-Workday.aspx) (https://meijer365.sharepoint.com/sites/ITSupport/ServicesWiki/SitePages/Data-Correction-Request-in-Workday.aspx) Did this solve your problem?". Below this, the "Confidence score" is shown as 59.71. A detailed explanation of the confidence score is provided in a box: "From 'Data Correction in Workday' IT Support Document: ## 'Data Correction Request in Workday' ### 'Purpose' User reports that they have entered data in to Workday that needs to be updated / corrected / fixed. Data can include any of the following: * Changing a Hire Date * Rescinding a Hire * Changing a Termination Date * Changing Job Records in the System * Pay Rate in regard to Steps * mPerformance Incident Correction ##".

Chatbot Analytics

What's left to do?

- Fine-tune ticket creation workflow
- Documentation
- Bug fixes
- Sending conversation data to support team
