Fall 2022

Project Overview

- Insurance industry is evolving to require mass amounts of data
- Problem:
 - Lack of access to image datasets
 - Privacy concerns with image data
- Solution:
 - Utilize AI models to automate dataset generation
 - Provide users ability to fine tune models to fit their specific purposes

Image-to-Image Generation Page

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/imageToImage'. The page has a dark blue header with a logo and navigation links: 'Image Generator', 'Image Gallery', 'Edit Image', 'Create Model', and 'Image to Image' (which is highlighted in red). The main content area is light blue and contains the following elements:

- Upload Drawing:** A section with an 'Upload Image' button.
- Model:** A dropdown menu currently showing 'general'.
- Number of images:** A text input field containing the number '3'.
- Advanced Options:** A button located below the model and number of images fields.
- Description:** A text input field containing the text 'car on fire'.
- Generate:** A large blue button to initiate the image generation process.
- Show Logs:** A blue button to view the generation logs.

At the bottom of the page, there are three small image thumbnails showing the results of the generation: a car on fire, a car with smoke, and a car on a road.

What's left to do?

- Features
 - None
- Stretch Goals
 - None
- Other Tasks
 - Clean up code
 - Edge case testing
 - Preparing project for transfer
 - UI tweaks
